

## UV LED Precautions

In order for Marktech Optoelectronics to send samples or purchased product the following operating precautions for UV LEDs must be understood and agreed to.

1. The UV LED during operation radiates intense UV light.
2. Do not look directly into the UV light during operation of the device. This can be harmful to the eyes even for brief periods of time.
3. If viewing the UV light is necessary, please use UV filtered glasses to avoid damage by the UV light.
4. If the UV LED in your product might be viewed directly, please affix a caution label to your product to that effect.
5. Avoid direct eye exposure to UV light.
6. Keep out of reach of children

I have read and understand the above cautions to be used with Marktech Optoelectronics UV products.
